DATE: March 26, 2009
TO: LAFCO Commissioners
FROM: Bill Nicholson, ^{Bh}
Executive Officer
RE: Municipal Service Review Status
(Agenda Item VIII.B)

LAFCO staff has worked with our Municipal Service Review (MSR) consultants, EPS, to complete drafts of three remaining categories of Special Districts, and will be scheduling two of them for the April 23, 2009 Commission Public Hearing. These remaining MSRs include the following:

- Resource Conservation Districts
- Cemetery Districts
- Other Independent Special Districts

The consultants have recently circulated the appropriate Draft MSR to each special district for their review and comment. However, we did discover that some of the data for districts which overlap the County boundary had incomplete data, and are working with our neighboring LAFCOs to update the information. These do not affect the Resource Conservation and Cemetery District MSRs which will be scheduled for action in April.

As a final note, there are two outstanding MSRs for the Cities of Atwater and Dos Palos which are the two remaining MSRs remaining to be completed. The City of Atwater was provided a draft last fall and got an indication they were trying to update some of the infrastructure capacity information. However, we have not started the Dos Palos MSR since no information has been received from the City.

Commission Action

This item is only an informational item. No action by the Commission is required.
